

Tech Session at Classic Car Motoring

February 13, 2010

Bob Hinds has arranged us to visit this facility that specializes in premium German car body and chassis repair.

Classic Car Motoring is the only site authorized by Mercedes-Benz for repair to the bodywork and paint. One of the Mercedes-Benz engineers told me they are the only place in the area that can truly duplicate the factory finish. They have the Clevite© frame repair jigs to restore damaged unibodies and the composite steel and aluminum assemblies.

After we arrive about 10am we will divide into small groups to visit the various stations to see different types of work being performed to see just how it is done at the factory.

Around noon they will serve us a barbeque lunch. There is no charge, but please let us know if you are attending, so they can prepare.

Directions to Classic Car Motoring, Inc.

From I-59 Tallapoosa Street Exit, go North on Hwy. 79, 4.3 miles to first left across bridge (Pine Hill Road). Go .9 miles to the second light. Turn left onto Concrete Drive.
No signs.

OR

From I-65 (at junction of I-59/I-20) go North 6.7 miles on I-65 to Walker Chapel Road exit #267. Exit right, go 1.1 miles to 5th traffic light, turn right onto Black Creek Road. Go 1.6 miles and turn right onto the first concrete drive just past the lake (traffic light).
No Signs.
